

WORK EXPERIENCE

Slyck — Founder Nov 2025 – Present (7m)

AI-powered software development as a service platform

- Founded and built the product end-to-end, owning all technical decisions from system architecture to production deployment.
- Used Claude Code as a core part of the workflow, driving feature delivery through expert-supervised agentic AI development.
- Designed and developed a production SaaS platform serving real clients on a recurring subscription model.
- Built and deployed **Affiliatr**, an internal affiliate management platform integrating Stripe webhooks and automated commission payouts.
- Operated as sole engineer, balancing high technical quality with fast commercial iteration across internal tools, client portals, and workflow automation.

Artlogic — Senior Software Engineer Feb 2020 – Oct 2025 (5y 8m)

Leading ArtTech company for art gallery management solutions

- Provided continued technical leadership and expertise after Artlogic's acquisition, ensuring seamless operations and platform stability.
- Built out the company support website and integrated new subscription pricing tiers, enhancing customer self-service and driving revenue growth.
- Led development of high-impact features such as scheduled email marketing campaigns to meet evolving gallery needs.
- Utilized Claude Code and GitHub Copilot alongside modern workflow tools to optimize developer velocity and code maintainability.
- Mentored engineering team members, promoting best practices and maintaining high code quality standards.

Resurgence Novels — Software Engineer Jan 2022 – Apr 2022 (3m)

Serialized reading mobile application for short stories

- Led end-to-end cross-platform mobile development for iOS and Android, serving a growing mobile reader community.
- Partnered with founding team to define system requirements, deliver core reading features, and align roadmap with engagement targets.
- Successfully published and launched app on App Store and Google Play.

React Native React Next.js Node.js TypeScript GCP iOS Android

Artlogic — Senior Developer + Designer Oct 2013 – Nov 2019 (6y 1m)

Art gallery websites & database solutions

- Spearheaded full redevelopment of industry-leading gallery management platform, leading a cross-functional team through full product lifecycle.
- Successfully launched modernized platform in 2016 with zero service disruption during legacy migration.
- Architected backend database solutions and scalable features for high-profile art galleries and international dealers.
